

QUALITY TEMPLATE - CTV

1. STRATEGY VALIDATION

A. Single Strategy Clarity

ONE strategy is clearly present:

- Eye-Catching (Bespoke Animation)
- Storytelling (Narrative Driven)
- Clever Concept (Witty Message)

B. Strategy-Specific Validation

If **Eye-Catching**:

- Animation is present in every scene.
- Motion enhances attention without distracting.
- Execution feels premium (smooth easing, no jitter).
- The piece does not rely on static slides.

If **Storytelling**:

- Clear beginning (context/problem).
- Clear middle (development).
- Clear resolution (brand role).
- Logical scene progression.
- Emotional tone is consistent.
- CTA is a natural part of storytelling.

If **Clever Concept**:

- The concept can be explained in one short sentence.
- Insight/hook is instantly understandable.
- No unnecessary narrative complexity.
- Wit reinforces brand positioning.

2. BRAND & CREATIVE IMPACT

A. On-Brand

Visual style aligns with brand guidelines.
Color system correctly applied.
Typography matches brand standards.
Tone of voice reflects brand personality.
Logo usage is correct and consistent.
Product representation aligns with brand positioning.
The video feels like part of the brand ecosystem.

B. Dynamism (Not Boring)

The video feels alive from start to finish.
No scene feels static or flat.
There are no 'dead' seconds.
Pacing maintains attention.
Movement feels intentional and energetic.
On Brand Text and Dynamic Typographic hierarchy.

C. Depth & Dimension (Not Flat)

Strong visual hierarchy.
Clear separation of foreground/midground/background (where applicable).
Use of scale, layering, parallax, or perspective.
Composition avoids single-plane layouts.
Lighting/shadows/motion enhance dimensionality.

D. Memorable Details

At least one distinctive visual or conceptual hook.
Craft details elevate the execution (micro-animations, texture, polish).
The video avoids looking generic.
After one viewing, something specific is recallable.

E. Format-Specific Validation

If CBV:

The frame adds value (not decorative).
Frame enhances clarity or reinforces the message.
Frame integrates naturally with the video content.
Copy inside the frame matches what is being advertised.
No disconnect between frame messaging and visuals.

Removing the frame would reduce clarity or impact.
Copy should not repeat the same as the video.

If CID:

Voice over matches the brand tone.
Voice over does not sound robotic or synthetic.
Voice pacing supports comprehension.
Music adds value to the message (not generic filler).
Sound effects elevate key moments.
Audio mix is balanced (VO, music, SFX).
Sound ends smoothly (no abrupt cuts).
Final audio moment feels intentional and resolved.

3. TECHNICAL EXECUTION

Balanced composition.
Clear visual hierarchy.
Key elements are not overcrowded.
Negative space is intentional.
Text duration allows comfortable reading.
No text cut-offs.
Transitions are smooth.
Easing feels natural.
Animation timing supports readability.
No rushed scenes.
No dragging pacing.
No jitter or technical artifacts.

4. FINAL APPROVAL GATE

Clearly follows one strategy.
Unmistakably on-brand.
Feels dynamic (not boring).
Has depth (not flat or static).
Contains memorable details.
Frame (CBV) adds value and aligns with message.
Audio (CID) enhances brand and ends smoothly.
No technical, legibility, or interaction issues remain.
QR works properly.

5. DECISION

Approved

Revisions Required

AI-Automated Review (Technical & Objective)

These items are repetitive, data-driven, and easy for AI to flag instantly.

Checkpoint	Category	Logic
Spelling & Grammar	AD COPY	OCR + LLM check for typos.
CTA Presence	AD COPY	Detects if buttons/text like "Shop Now" exist.
Logo Visibility	VISUAL	Computer Vision (CV) to ensure the logo is present and not obscured.
Legal Text (OCR)	VISUAL	Verifies if disclaimers are legible and meet minimum font size.
Safe Zones	TECHNICAL	Ensures no critical text is cut off by TV bezels (UI overlays).
Resolution & Bitrate	TECHNICAL	Checks file metadata (e.g., 1080p, 15Mbps).
Audio LUFS Levels	TECHNICAL	Analyzes audio waveform for loudness compliance.
QR Code Integrity	TECHNICAL	Scans frame-by-frame to ensure the QR code is scannable and links to the right URL.
Color Palette	BRAND	Extracts dominant colors to match brand hex codes.

Human-in-the-Loop Review (Creative & Subjective)

These items require "feeling," brand taste, and strategic judgment.

Checkpoint	Category	Logic
Brand Voice Alignment	AD COPY	Does the copy sound like the brand (AI can suggest, but Human decides).
Intentional Negative Space	BRAND	Is the composition balanced? Does it feel "premium"?
Pacing & Flow	TECHNICAL	Does the ad feel "rushed" or "dragging"?
Emotional Impact	BRAND	Does the music and imagery evoke the desired feeling?
Creative Strategy	FINAL	Does this ad actually fulfill the client's brief?
Depth of Detail	BRAND	Does the ad look state-of-the-art? (Premium vs. Basic).

☐ Hybrid Review (AI-Assisted)

AI flags it, Human confirms.

Checkpoint	Category	AI Role	Human Role
Transitions/Easing	TECHNICAL	Detects frame-rate drops or "jitter".	Confirms if the motion "feels" natural.

Actionable Messaging	AD COPY	Categorizes type of CTA.	Confirms if the CTA is "compelling" enough.
Ad Length/Duration	TECHNICAL	Measures time precisely.	Decides if the content fits the time window well.
